

Roundtable on Data Sharing Policies, Data-Driven Solutions, and the Opioid Crisis

PARTICIPATING ORGANIZATIONS

Businesses, Nonprofits, and Academia

AcademyHealth, State University Partnership Learning Network collaboratively works to support evidence-based state health policy and practice with a focus on transforming Medicaid-based healthcare, including improving the patient experience, improving the health of populations, and reducing the per capita cost of healthcare.

Accenture Federal Services, a wholly owned subsidiary of Accenture LLP, delivers federal solutions to clients at defense, intelligence, public safety, civilian and military health organizations.

Appriss Health provides one of the nation's most comprehensive platforms for early identification, prevention and management of substance use disorders.

Biobot Analytics develops cutting-edge technology to transform sewers into public health observatories. This includes measuring opioids and other drugs in sewage to estimate consumption in cities.

Booz Allen Hamilton is a provider of management consulting, technology, and engineering services to the U.S. government in defense, intelligence, and civil markets, and to major corporations, institutions, and nonprofit organizations.

BrightHive is an impact-driven data technology company using data trusts to transform the way social services providers, government agencies, and funders share data, make decisions, and affect the outcomes of beneficiaries.

The Center for Data and Technology is a nonprofit organization with deep knowledge of issues pertaining to the internet, privacy, security, technology, and intellectual property.

The Center for Open Data Enterprise is an independent nonprofit organization that develops smarter open data strategies for governments, businesses, and other nonprofits by focusing on data users.

F3 Healthcare focuses on making healthcare better, safer, and less expensive by turning data into actionable intelligence.

Health Haven Hub is an incubator for startups within the medical field that aims to become a workspace for medical innovation for the state of Connecticut and further support global innovators across the world in their early stages of development.

The High Intensity Drug Trafficking Areas (HIDTA) program is designed to provide resources to federal, state, local, and tribal agencies to coordinate activities to address drug trafficking in specifically designated areas of the country.

HMS advances the healthcare system by helping payers reduce costs and improve health outcomes. This includes delivering coordination of benefits, payment integrity, and health engagement solutions to health plans, state agencies, federal programs, employers, and at-risk providers.

IEEE is the world's largest professional association dedicated to advancing technological innovation and excellence for the benefit of humanity.

The Indiana Poison Center is an independent, nonprofit agency providing coverage and services for the entire state of Indiana. It is a collaborative effort of the Indiana State Department of Health (ISDH), Indiana University Health (IU Health), the Federal HRSA Poison Control Program and healthcare providers throughout the state.

The Indiana University School of Medicine is one of the largest medical schools in the United States. Its mission is to advance health in the state of Indiana and beyond by promoting innovation and excellence in education, research and patient care.

IQVIA is committed to providing solutions that enable life sciences companies to innovate, maximize opportunities, and drive human health outcomes forward.

The Louisiana Public Health Institute works to uncover complementary connections across sectors to combine the social, economic, and human capital needed to align action for health.

The Network for Excellence in Health Innovation (NEHI) is a national nonprofit, nonpartisan organization composed of stakeholders from across all key sectors of health and healthcare. Its mission is to advance innovations that improve health, enhance the quality of healthcare, and achieve greater value for the money spent.

Origami Innovations is a student-led innovation, design, and solution lab in New Haven, Connecticut that empowers students and community members to imagine, design, and co-create tangible, disruptive, and purpose-driven solutions to pressing issues.

Patient-Centered Outcomes Research Institute (PCORI) helps people make informed healthcare decisions, and improves healthcare delivery and outcomes, by producing and promoting high-integrity, evidence-based information that comes from research guided by patients, caregivers, and the broader healthcare community.

Physicians for Responsible Opioid Prescribing (PROP) works to reduce opioid-related morbidity and mortality by promoting cautious and responsible prescribing practices.

The Regenstrief Institute is a medical research and development organization focused on improving quality of care, efficiency of healthcare delivery, and enhancing patient outcomes.

The Robert Wood Johnson Foundation is the nation's largest philanthropy dedicated solely to health.

Telesphora was formed in a collaboration with Origami Innovations – a design, innovation, and solution lab powered by Yale University students – to bring together data-scientists and subject matter experts to create data-driven solutions to the opioid crisis.

The University of Chicago Center for Data Science and Public Policy is a collaboration between The Harris School of Public Policy and the Computation Institute to further the use of data science in policy research and practice.

The University of Pittsburgh Graduate School of Public Health is among the country's best public health programs, recognized for its contributions to public health practices and medical care in the Pittsburgh region and around the world.

The Visionist Inc. develops custom software solutions and analysis services, transforming the way agencies make sense of their data.

The World Economic Forum is an independent international organization committed to improving the state of the world by engaging business, political, academic and other leaders of society to shape global, regional and industry agendas.

Wormeli Consulting provides consulting services in the innovative use of information technology and information sharing in public service.

State and Local Government Agencies and Offices

The State of California, Marin County's mission is to provide excellent services that support healthy, safe and sustainable communities; preserve Marin's unique environmental heritage; and encourage meaningful participation in the governance of the County by all.

The State of Indiana, Family and Social Services Administration's mission is to develop, finance and compassionately administer programs to provide healthcare and other social services to Hoosiers in need in order to enable them to achieve healthy, self-sufficient and productive lives.

The State of Kentucky, Cabinet for Health and Family Services' mission is to deliver quality services that enhance the health, safety, and wellbeing of all people in the Commonwealth of Kentucky.

The State of Maryland, Department of Health works to promote and improve the health and safety of all Marylanders through disease prevention, access to care, quality management, and community engagement.

The State of Massachusetts, Department of Public Health promotes the health and well-being of all residents by ensuring access to high-quality public health and healthcare services, and by focusing on prevention, wellness and health equity in all people.

The State of Missouri, Department of Health and Senior Services' mission is to be the leader in promoting, protecting and partnering for health.

The State of Pennsylvania, Department of Health works to promote healthy lifestyles, prevent injury and disease, and to assure the safe delivery of quality health care for all Commonwealth citizens.

The State of Tennessee, TennCare is the state's managed care Medicaid program which provides health insurance coverage to certain groups of low-income individuals such as pregnant women, children, caretaker relatives of young children, older adults, and adults with disabilities.

The State of Virginia, Department of Medical Assistance Services' mission is to provide a system of high quality and cost effective health care services to qualifying Virginians and their families.

The State of West Virginia, Department of Health and Human Resources is the state agency charged with overseeing the health response to disasters occurring within the borders of West Virginia.

Federal Government Agencies and Offices

The U.S. Department of Commerce's mission is to create the conditions for economic growth and opportunity. The Department works with businesses, universities, communities, and the Nation's workers to promote job creation, economic growth, sustainable development and improved standards of living for Americans.

The U.S. Census Bureau's mission is to serve as the leading source of quality data about the nation's people and economy. The Census Bureau is overseen by the Economics and Statistics Administration.

The U.S. Department of Health and Human Services is a cabinet-level department of the U.S. federal government with the goal of protecting the health of all Americans and providing essential human services.

The Agency for Healthcare Research and Quality's (AHRQ) mission is to produce evidence to make health care safer, higher quality, more accessible, equitable, and affordable, and to work within the U.S. Department of Health and Human Services and with other partners to make sure that the evidence is understood and used.

The Biomedical Advanced Research and Development Authority's (BARDA) mission is to develop and procure needed medical countermeasures, including vaccines, therapeutics, diagnostics, and non-pharmaceutical countermeasures, against a broad array of public health threats, whether natural or intentional in origin.

The Centers for Disease Control and Prevention Center (CDC) works to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same.

The National Center for Health Statistics (NCHS), part of the Centers for Disease Control and Prevention (CDC), compiles statistical information to help guide policies to improve the health of Americans. Holds a biennial data user conference; consult the NCHS website for date and location. NCHS disseminates data and statistics online and in print.

The Centers for Medicare and Medicaid Services' (CMS) mission is to ensure that the voices and needs of the populations we represent are present as the agency is developing, implementing, and evaluating its programs and policies.

The Food and Drug Administration is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation.

The Immediate Office of the Secretary (IOS) is responsible for operations and coordination of the work of the Secretary.

The Office of the Assistant Secretary for Health (OASH) oversees 12 core public health offices – including the Office of the Surgeon General and the U.S. Public Health Service Commissioned Corps – as well as 10 regional health offices across the nation and 10 presidential and secretarial advisory committees.

The Office of the Chief Technology Officer (CTO) provides leadership and direction on data, technology, innovation and strategy across the U.S. Department of Health and Human Services. Areas of focus include promoting open data and its use to create value, driving more efficient operations through technology utilization, and coordinating innovation strategy across the Department to improve the lives of the American people and the performance of the Department.

The Substance Abuse and Mental Health Services Administration (SAMHSA) is the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation. SAMHSA's mission is to reduce the impact of substance abuse and mental illness on America's communities.

The U.S. Department of Veterans Affairs' mission is to fulfill the promise of President Lincoln to the Veterans of the United States armed services, which is to provide Healthcare to those who have served, and to their families.

The White House, Office of Management and Budget's mission is to serve the President of the United States in implementing his vision across the Executive Branch.
